I enjoyed taking your course on GPS, Google and other maps and Spatial Computing. I only took the Concepts part of the course and did well enough to earn a certificate, and was not able to attempt the Technical Track projects, due to having issues installing the VM and tools on my computer, but even so, I learned a great deal about this growing area and see that it's future is very important in our world today. I found it interesting and see that all of our futures will be affected by it. I can also see how it can solve many problems in our world and help us, but I can also see how it can be taken and abused by people, and I hope there is just as much effort to make sure that does not happen, as it solves tough problems in the worlds in which we live. So thank you for a great course, and the opportunity to learn from your free online course! Best wishes to you all in the future. ;-)
